The Kore, Greek for Virgin, is a mysterious figure. Youthful and elusive, the Kore personifies an archetypal state wherein a person becomes one-in-herself. In C.G. Jung's essay "The Psychological Aspects of the Kore" (1951), he makes the astonishing statement that the Kore is a Self-figure for women and has a power that is equivalent to that of the Mother. These two rarely discussed ideas have significance for women's psychology and have direct bearing upon the development of feminine consciousness in both women and men. Who is this figure that is accorded such psychological power and significance? Drawing from the presenter's book *The Kore Goddess: A Mythology and Psychology* (2021), in this seminar we will explore the pattern of the Kore through archaic Greek statues and myth in order to discern how and where the Kore appears in life and plays a critical role in individuation.

### Learning Objectives:

1. Understand the significance of the Kore in Jung's psychology of archetypes
2. Identify the qualities of the Kore archetype through ancient sculpture and Greek myth
3. Locate and reflect upon how the Kore archetype appears in life
