

Friday September 15 from 7:30 PM to -9:00 PM

SAFOJ Annual Meeting

with a preview of Christine Clawley's film "Tapestry of Time"

Our annual meeting will begin with a brief introduction by our president Charles Gillispie, and a member vote on Board Officers and At-Large Board Members for 2023/24.

After this first segment (about 15 minutes) of Board business, we are pleased to present a preview of *Tapestry of Time*, SAFOJ Board Member Christine Clawley's film in progress, followed by a discussion.

Existing members, those considering joining, and those just curious--are all welcome!

About Tapestry of Time:

Nearly everyone has experienced brief moments of insight, clarity, or a sense of timelessness in which life begins to take on a dreamlike quality. In these moments, the magic and wonder of life often returns and we can experience mundane or profound synchronicities.

Synchronicity grants the individual a glimpse into a deeper reality, beyond the limits of space, time, and causality—a reality that resembles physicist David Bohm's idea of the implicate order, from which physical phenomena emerge

This film's aim is to give voice to those experiences and provide a platform for individuals to learn about and explore alternative theories of time and re-examine their own personal relationship to time.
